PROJECTS

SMART PLUG AND PAYMENT SYSTEM VIA CLOUD-ENABLED MOBILE APPLICATION

UI/UX Designer | Frontend Developer

- The Smart Plug and Payment System app allows users to remotely control smart plugs, monitor real-time power usage, and manage energy expenses. This project utilized Figma, FlutterFlow, Google Cloud Firestore, and Arduino IDE. I was responsible for creating wireframes, designing mockups, and developing the mobile app with its data connected to the database. This project highlights my skills in both UI/UX design and frontend development, resulting in a fully functional mobile application.

W&D DREAMLAND RESORT INFORMATIONAL WEBSITE

UI/UX Designer | Frontend Developer

- This informational website offers visitors comprehensive details about the resort's facilities, services, and contact information. For this project, Canva was used for graphic design, while HTML, CSS, JavaScript, and PHP were employed for building the website. My role involved handling UI/UX design and frontend development, utilizing Visual Studio Code. This project showcases my ability to craft visually appealing and functional websites, merging design aesthetics with technical proficiency to create a smooth user experience.

KAPE KAPITOLYO E-COMMERCE SITE

UI/UX Designer | Frontend Developer

- The website is a reservation platform where customers can book seats, order food, view the menu, and access relevant announcements. It also features a user account system for personalized access. For this project, Canva, HTML, CSS, JavaScript, and PHP were employed. My role involved crafting the UI/UX design and handling frontend development using Visual Studio Code. This project highlights my skills in building an engaging booking website that effectively combines design and functionality.

SKILLS
